

DAILY WORK LOG

Visual Walkthrough

Real screens, shown as they appear on iPhone 15 · v2.5

Every tab and feature, captured directly from the app,
with plain-language notes for first-time users.

What's Inside

1. Signing In
2. Creating an Account
3. New Entry — Blank Form
4. New Entry — Logging a Deadhead
5. New Entry — Building a Mixed Queue
- 5b. The Queue, Fully Loaded
- 5c. After Saving — Everything Lands in the Log
6. View Logs — Detail View
7. View Logs — List View
8. Fuel Pins
9. Pay Check — Detail View
10. Pay Check — List View
11. Trip Rates
12. Trash
13. Data & Admin Tools
14. Your Profile
15. Resetting a PIN (Admin)

Note: these screens were captured from an admin account so every feature — including admin-only tools — could be shown. A regular driver account looks identical, minus the admin sections noted along the way.

1. Signing In

This is the first thing you see when you open the app. Enter the User ID and PIN your admin gave you (or that you set when registering), then tap **Sign In**.

- Forgot your PIN? An admin can reset it for you — see section 15.
- No account yet? Tap the **Register** tab.
- Just looking? Tap **Continue as Guest** at the bottom — no account needed, but nothing syncs.

The image shows a mobile app interface for 'DAILY WORK LOG' with the subtitle 'TMW / DEADHEAD TRACKER'. At the top, there are two tabs: 'LOGIN' (active) and 'REGISTER'. Below the tabs, there are two input fields: 'USER ID' with the placeholder text 'your user id' and '4-DIGIT PIN' with four dots. A large 'SIGN IN' button is centered below the inputs. Underneath the button, it says 'Forgot your PIN? Contact your admin to reset it.' followed by a horizontal line. Below the line, it asks 'JUST BROWSING?' and provides a dashed 'CONTINUE AS GUEST' button. At the very bottom, a note states 'Guest data is stored on this device only. No sync or backup.'

4-DIGIT PIN
....

SIGN IN

Forgot your PIN? Contact your admin to reset it.

JUST BROWSING?

CONTINUE AS GUEST

Guest data is stored on this device only.
No sync or backup.

2. Creating an Account

Tap the **Register** tab and fill in three things: a short **User ID** you'll log in with, your **Display Name**, and a **4-digit PIN**. Tap **Create Account** and you're in immediately — no email or approval needed.

Heads up: new accounts start without access to the Fuel Pins and Trip Rates tabs. An admin needs to turn that on for you (section 13).

3. New Entry — Blank Form

This is your home base — logging starts here every time. Set the **Date** and **Truck Number** first, then choose **Deadhead** or **TMW** to reveal the right fields for that type of work.

4. New Entry — Logging a Deadhead

After tapping **Deadhead**, fill in the DH number, a short reason, and your start/end time — the claimed time (1.50 here) calculates itself. The **Reference Number** at the bottom is what ties this claim to your employer's pay statement later.

5. New Entry — Building a Mixed Queue

Instead of saving one entry at a time, tap **Add to Queue** to stack up several before saving. Notice the toast confirming "**DH #4410344 added to queue**" and the "**QUEUE — 1 ENTRY**" counter below the form.

- You can freely switch between Deadhead and TMW while queuing — mix and match in any order.
- When you're done, one tap saves every queued entry at once.

5b. The Queue, Fully Loaded

Here's the queue after adding a third entry — **one Deadhead and two TMWs**, mixed freely in any order. Each card shows a quick summary, with an × to remove it before saving if you change your mind.

The button now reads "✓ **SAVE 3 ENTRIES**" — one tap saves everything at once.

5c. After Saving — Everything Lands in the Log

Tapping **Save 3 Entries** writes all three at once and jumps straight to View Logs, with a **"3 entries saved"** confirmation. All three appear together under the same date, exactly as queued — the Deadhead claim and both TMW loads (each showing its matched site rate).

9. Pay Check — Detail View

This is where pay gets tracked. The three cards at the top count entries by **Real Pay Pending**, **Final Paid Pending**, or show **All Entries** — tap any card to filter.

Every claim gets its own **Real Pay** and **Final Paid** dropdown, so partial payments are tracked accurately down to the individual claim.

11. Trip Rates

A lookup list of pay rates by site — when you log a TMW entry, the app checks this list automatically and shows the going rate for that site.

Same as Fuel Pins: admin edits here publish instantly to the whole team's shared list.

12. Trash

Deleted entries land here for **30 days** before being permanently removed — nothing is erased right away. This entry shows **"Deletes in 28 days"** with Restore and Delete Permanently options.

- **Auto-Deleted After Pay** — entries the app moved automatically, 7 days after being fully paid.
- **User Deleted** — entries you removed yourself.

13. Data & Admin Tools

Every account sees **App Info** (version, build, and live sync status) and backup/export tools here. Admin accounts additionally see **User Access Control** at the bottom — the full roster of registered drivers.

- Two checkboxes per driver control access to Trip Rates and Fuel Pins.
- New drivers (like John Smith here) start with both unchecked, by design.
- The key icon next to a name opens the Reset PIN tool (section 15).

14. Your Profile

Tap **Profile** in the header to open this panel — change your display name, set a new PIN (leave the fields blank to keep your current one), or sign out with a confirmation prompt so it never happens by accident.

The screenshot shows a mobile application interface with a modal open for editing a user profile. The background app is titled 'DAILY WORK LOG' and shows a sync status of 'Jul 13, 04:50:50 MST'. The user 'Fleet Admin' is selected, with a 'PROFILE' button in the header. Below the header are buttons for 'NEW ENTRY', 'VIEW LOGS', and 'FUEL PINS'. The modal, titled 'PROFILE — FLEET ADMIN', contains the following fields and options:

- USER ID:** A text field containing 'admin'.
- DISPLAY NAME:** A text field containing 'Fleet Admin'.
- CHANGE PIN:** A section with the instruction '(leave blank to keep current)'.
- NEW PIN (4 DIGITS):** A masked text field with four dots.
- CONFIRM NEW PIN:** A masked text field with four dots.
- Buttons:** 'CANCEL' and 'SAVE CHANGES' at the bottom of the modal, and a 'SIGN OUT' button below the modal.

Below the modal, the app shows a list of users:

- Takhar Sukhbir** (ADMIN, taksuk) with 'Full access'.
- John Smith** (jsmith) with a key icon.

At the bottom, there are checkboxes for 'Trip Rates' and 'Fuel Pins'.

15. Resetting a PIN (Admin)

If a driver forgets their PIN, an admin taps the key icon next to their name in User Access Control, enters a new 4-digit PIN, and confirms. Share the new PIN with the driver directly — the app never displays or stores anyone's PIN in plain text, so this is the only way to recover from a forgotten one.
